The Evolution of Enlightenment: Can Science and Religion Co-Exist? February 14-17

We hope you'll join us as we consider the origins of God, man, and morality, in view of the Bible and the scientific approach. We'll attempt to answer the questions: Is God and religion a mythological (superstitious) endeavor or an intellectual and rational one? And, Can Science and Religion truly co-exist together for the common good of all mankind? Friday through Sunday evenings, there will be a two hour dialectic discussion between Atheist, Matt Dillhenty from Austin, TX, and Gospel Preacher, Israel Rodriguez from Brownsville, TX. See back for a full schedule.
